DETAILED ACTION

In response to applicant's response to restriction requirement (paper #8), the previous restriction has been withdrawn, however upon further consideration, the following restriction has been set forth.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1,2, drawn to a cart and track assembly, classified in class 172, subclass 80.
- II. Claims 3,4, drawn to a foldable frame, classified in class 172, subclass 311.
- III. Claim 5, drawn to a wheel apparatus, classified in class 280, subclass 38.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as with a non-agricultural frame that is not foldable or stackable. Additionally, invention II has separate utility such as being used without a cart or track assembly. See MPEP § 806.05(d).

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as with a non-agricultural frame. Additionally, invention II has separate utility such

as with an agricultural frame that does not use a self-tucking wheel apparatus. See MPEP § 806.05(d).

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as being used with a frame or vehicle that does not use a track assembly. Additionally, invention I has separate utility such as being used with a frame that does not use a self-tucking wheel apparatus. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
